

January 4, 1978

Dear fellow Kennedy assassination researcher,

This memo was sent to each member of the Kennedy subcommittee of the ESCA on the above date. Members Stokes and Fauntroy also were sent copies. Copies are being sent to several researchers.

We must continue to work to clear up the JFK assassination. In truth, the investigation (by us) is just now entering a new phase. It appears to me that some of the major matters before us are:

- * further testing of the motorcycle tape to find the other shots from other areas, which must be there
- * proving that Oswald fired no shots but was a patsy
- * impeaching the validity of the medical evidence, which we know to be lacking in authenticity. This relates to..
- * proving that the shot from the knoll hit the President.
- * uncovering the cover-up, which deliberately framed Oswald, especially the roles played by Warren Commission, Dallas Police, CIA, Secret Service, and certain of the media (Time-Life, CBS, for example).

Any comments on this memo may be directed to:
